About Company

Techsoul is a next-generation software development and digital innovation company dedicated to building intelligent, high-performance solutions that empower businesses to scale and succeed in the modern digital era.

We specialize in Web & Mobile Application Development, SaaS Platforms, ERP Systems, AI-Powered Solutions, and WordPress Websites, delivering world-class technology to both local and international clients.

Our goal is simple — to turn ideas into impactful digital products using cutting-edge technologies and human-centered design. From startups to enterprises and public sector organizations, Techsoul offers tailored, efficient, and scalable software solutions that drive measurable growth.

Company Mission

To empower businesses and institutions with intelligent, reliable, and future-ready digital solutions that accelerate growth, efficiency, and innovation.

Company Vission

To become a global leader in software innovation and a trusted technology partner for both private and government sectors, shaping a smarter, more connected future.

Our CoreValue

Innovation

Continuously exploring emerging technologies to deliver creative and impactful solutions.

Integrity

Building transparent, honest, and trustworthy relationships with clients and partners.

Collaboration

Working as one team with clients, fostering long-term partnerships.

Excellence

Maintaining world-class standards in every stage — from design to deployment.

Privacy & Data Security

Designing technology solutions that are scalable, secure, and built for the future.

Legal & Corporate Information

Company Name: Techsoul

Business Type: Software Development & IT Solutions Provider

Company Name: Techsoul

Headquarters: Dhaka, Bangladesh

Business Model: B2B, B2C, SaaS, and Government IT Projects

Markets Served: Local (Bangladesh) & International
(North America, Europe, Middle

Legal Status: Proprietorship Company

Company History & Background

Techsoul started with a vision to make modern technology accessible for every business. Founded by a group of passionate developers and innovators, we began building custom web and mobile solutions for local clients and quickly expanded into international markets.

Over time, Techsoul has grown into a trusted software company specializing in web apps, mobile apps, SaaS, ERP, and AI solutions. Using modern technologies like React, Next.js, NestJS, FastAPI, Prisma, Docker, PostgreSQL, MongoDB, Redis, and AI models, we deliver scalable and intelligent systems that power businesses worldwide.

Today, Techsoul proudly serves clients across Bangladesh, the USA, Europe, and the Middle East, with a strong focus on quality, innovation, and long-term partnership. We are also preparing to collaborate on Bangladesh Government digital transformation projects, contributing to the nation's smart technology future.

Message from- Managing Director

"At Techsoul, our mission is to transform ideas into innovative digital solutions. We believe in blending technology with creativity to help businesses grow and thrive in the digital era."

MD Atiqul Islam

Message from Chief Executive Officer

"Our focus is on delivering excellence and building long-term partnerships. At Techsoul, we turn challenges into opportunities and ensure every project reflects quality, innovation, and trust."

Manishankar

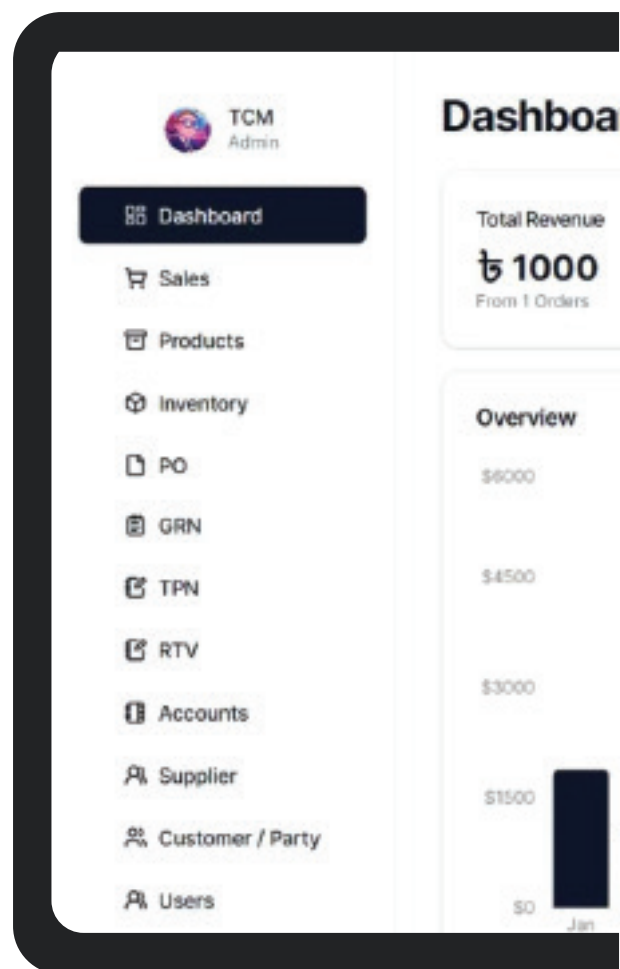

Web Application Development

Techsoul develops modern, secure, and scalable web applications that enhance user experience and streamline business operations.

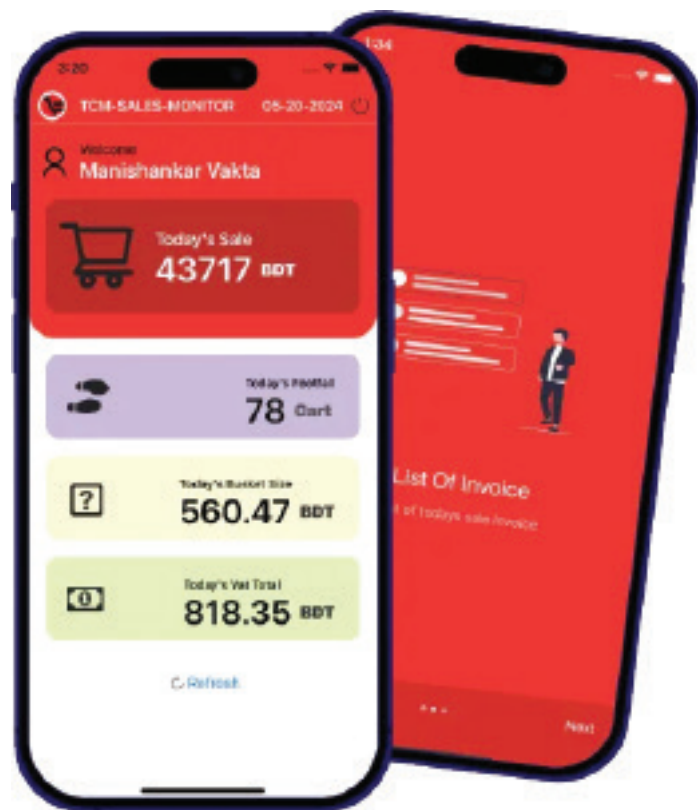

Key Features:

- Responsive, cross-browser compatible web apps
- High-performance and scalable architecture
- Interactive UI/UX with intuitive workflows
- REST & GraphQL API integration
- Cloud-ready deployment with CI/CD pipelines
- Security, authentication, and data protection

Mobile App Development

Techsoul builds high-performance, cross-platform mobile applications for Android and iOS that deliver seamless user experiences and drive business growth.

Key Features:

- Cross-platform apps with React Native
- Smooth, intuitive UI/UX
- Push notifications and offline support
- API integrations for dynamic data
- Secure and scalable architecture

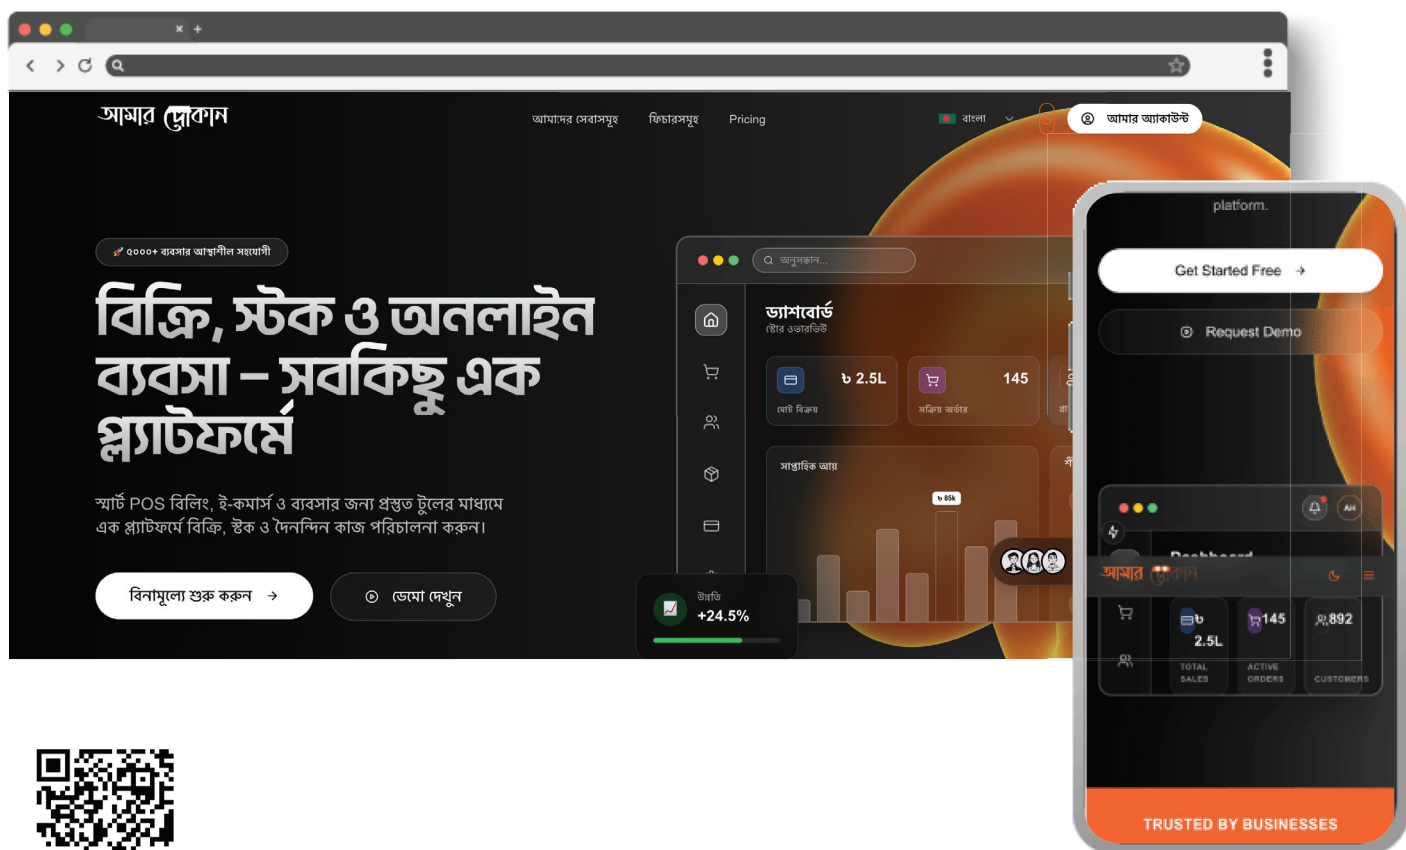

SaaS Product Development

Techsoul designs and develops cloud-based SaaS platforms that are scalable, secure, and ready for global users. Our SaaS solutions help businesses automate operations, manage customers, and generate recurring revenue.

Key Features:

- Multi-tenant architecture for scalability
- Secure cloud deployment with CI/CD
- Automated workflows and reporting
- API integrations and payment gateways
- Real-time analytics and dashboards

AI & Machine Learning Solutions

Techsoul builds intelligent AI-powered applications that automate processes, provide insights, and enhance decision-making for businesses. We integrate AI and ML to create smarter solutions across industries.

Key Features:

- Natural Language Processing (NLP) applications
- Predictive analytics and data-driven insights
- AI-powered chatbots and virtual assistants
- Automation of repetitive tasks and workflows
- Integration with web, mobile, and SaaS platforms

WordPress & CMS Development

Techsoul creates fast, secure, and scalable WordPress and CMS websites tailored to your business needs. We build platforms that are easy to manage, SEO-friendly, and optimized for performance.

Key Features:

- Custom WordPress themes and plugins
- Responsive, mobile-friendly designs
- SEO optimization and performance tuning
- Integration with third-party APIs and tools
- Easy content management and updates
